

US EPA Integrated Report guidance categories used in *Louisiana's 2004 Integrated Report*

Category 1: Specific waterbody impairment combination (WIC) cited on a previous 303(d) list is now attaining all designated uses and standards.

Category 2: Waterbody is meeting some uses and standards but there is insufficient data to determine if designated uses and standards *associated with the specific WIC* cited are being attained.

Category 3: There is insufficient data to determine if designated uses and standards *associated with the specific WIC* cited are being attained.

Category 4a: WIC exists but a TMDL has been completed for the *specific WIC* cited.

Category 4b: WIC exists but control measures other than a TMDL are expected to result in attainment of designated uses and standards *associated with the specific WIC* cited.

Category 4c: WIC exists but a pollutant does not cause the *specific WIC* cited.

Category 5: WIC exists for one or more designated uses, and a TMDL is required for the *specific WIC* cited. *This represents Louisiana's §303(d) List.*
